## **DETAILED ACTION**

### ***Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. Because of an apparent typographical error, there is no claim 4. Rather, claims 4 and 5 were numbered 5 and 6 respectively.

Misnumbered claims 5 and 6 been renumbered 4 and 5.

### ***Allowable Subject Matter***

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest a device and method having all of the limitations of claims 1 and 4. While door breach training and devices are generally known, there is no suggestion of a device having each and every element of claim 1. Bishop (US 5,906,493) is the closest prior art, at is discloses pins in a door segment and corresponding sockets in an adjacent door section, where the pins are designed to break when a given level of force is applied thereto. However, the operation of the Bishop device is substantially different from that of the present invention. Bishop is directed to the use of a crowbar to pry a section of door away; the present invention allows for separating the entire door from the door frame. There is no suggestion to modify Bishop by providing pins in a door and sockets in a door frame to which the door

is hingedly attached, to provide a training system where the entire door must be moved from the frame. As a result, claims 1 and 4, and the dependent claims therefrom, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bishop (5,906,493 and 6,358,057), Schmid, Whitmer, Musto and "Ballistics Technology International" disclose various firefighter training devices and methods.
